

Your Mining Host Report

Independent verification of hosted ASIC performance using pool-observed data.

DEMO DATA: All customer, host, contract, pricing, and mining figures in this sample are simulated.

Customer	Demo Mining LLC	Period	August 2026
Fleet	12 S21-series ASICs	Hosts	2 facilities
Pools	Foundry + Luxor	Mode	Read-only audit

Executive Summary

Expected hashrate	Observed average	Delivery rate	Est. lost production
3.02 PH/s	2.83 PH/s	93.7%	\$428

MineDocks Host Score
Composite demo score

82

GOOD - REVIEW NEEDED
Facility South materially underperformed its simulated hosting expectation.

Finding	Scope	Observed	Interpretation
Facility North	6 miners	97.8%	Within 97% demo expectation
Facility South	6 miners	89.6%	Below 96% demo expectation
Worker S21-09	1 miner	81.2%	Persistent underperformance
Fleet-wide event	12 miners	2h 17m	Shared outage; cause unverified

Host-by-Host Performance

Metric	Facility North	Facility South
Hosted ASICs	6	6
Expected hashrate	1.51 PH/s	1.51 PH/s
Observed average	1.48 PH/s	1.35 PH/s
Delivery rate	97.8%	89.6%
Contract expectation (demo)	97%	96%
Unexplained downtime	5h 12m	34h 41m
Est. lost production	\$71	\$357
MineDocks score	94 / 100	68 / 100

Worker Exceptions

Worker	Host	Expected	Observed	Delivery	Flag
S21-07	South	252 TH/s	229 TH/s	90.9%	Watch
S21-08	South	252 TH/s	218 TH/s	86.5%	Review
S21-09	South	252 TH/s	205 TH/s	81.2%	Critical
S21-11	South	252 TH/s	231 TH/s	91.7%	Watch

Economics & Billing Reconciliation

Metric	Demo result
Gross mining revenue	\$4,986
Hosting + power billed	\$3,214
Pool / operating fees	\$104
Estimated lost production	\$428
Net operating contribution	\$1,668
BTC produced	0.0438 BTC
Effective operating cost / BTC	\$75,753

Proposed MineDocks value: reconcile three independent sources - what the hosting contract promised, what the mining pool actually observed, and what the customer was invoiced. MineDocks would flag discrepancies without claiming to know the cause of an outage unless supporting evidence exists.

Prototype validation question: Would a hosted-mining owner connect read-only pool data and pay for continuous independent monitoring if this report reliably identified lost production, SLA shortfalls, and billing discrepancies?
